

Guided Observation Program

VIDEO CHECKLIST

The following videos are approved for the Simucase Guided Observation Program for physical therapy. This self-paced guided observation program provides the opportunity to observe physical therapy practice across the lifespan and in a variety of practice settings. Only the videos included in this list will count toward your observation hours. All videos should be viewed in interactive mode. To ensure your participation is recorded on your Simucase transcript, answer all questions and watch each video in its entirety. Place a check beside each video that you complete, then sign and date your form when you have completed your participation in the Simucase Guided Observation Program.
